

Yaroslav Romaniuk

Middle Full Stack Developer | 3 Years Experience | Main stack: .NET + Angular

+380 68 427 9550 yaroslavromaniuk025@gmail.com [linkedin.com/in/yaroslav-romaniuk-b5ba812b9/](https://www.linkedin.com/in/yaroslav-romaniuk-b5ba812b9/)
github.com/Kyrky t.me/risedoom

PRIMARY STACK

Main Stack

.NET (ASP.NET Core Web API) + Angular

Backend

ASP.NET Core / Web API, EF Core, MediatR / CQRS, WPF, Node.js / NestJS

Frontend

Angular, NgRx, RxJS, TypeScript, React, React Native, Next.js, Redux Toolkit, Tailwind

Messaging & Realtime

RabbitMQ / MassTransit, SignalR, Server-Sent Events, socket.io

Databases

PostgreSQL, MongoDB, MySQL, Redis, OpenSearch

Tools & Integrations

Docker, Git, Stripe, Firebase, Supabase, Azure, AWS

EDUCATION

Software Engineering

DUICT (University), Kyiv
Expected Graduation: 2027
Available for full-time work

EXPERIENCE

.NET Full Stack Developer

2024 - Present

ASP.NET Core + Angular: retail POS system, then ERP/CRM products

- 2024 - 2025: built POS (cash-register) and CRM features for a large grocery retail chain on .NET + Angular + 1C.
- Designed a document-flow regression mechanism: 1C changes, synced via the CRM, emitted RabbitMQ commands; registers applied storno operations to keep documents balanced.
- 2025 - 2026: developed ERP/CRM modules on ASP.NET Core + Angular, plus a couple of months on a WPF desktop client.

Full Stack Developer · Outstaff

2024 - Present

Full-stack in two stacks, JS / TS and .NET + Angular, on fintech, InsurTech and EdTech products

- Built a real-time payments app (React Native, 6 months) plus embedded checkout, POS and merchant / admin portals (Next.js 16 / React 19) on PayShap rails (South Africa); delivered solutions for backend issues in the .NET 9 API.
- Delivered a US InsurTech multi-portal SPA (React 19 + Redux Toolkit) and a Brazil EdTech marketplace (Next.js, Stripe + local payments).
- Built a corporate site (Next.js + NestJS + Supabase) and an AI meeting-transcription browser extension.

Full Stack Developer · Freelance & Startups

2023 - 2024

Startups (HR-tech, radiophysics) on Angular + .NET & client websites

- Built an HR-tech platform with LLM-driven interviews (Angular + .NET, Clean Architecture, CQRS, RabbitMQ, async PDF reports).
- Built a radio base-station monitoring dashboard (Angular + NgRx + OpenLayers WebGL, .NET backend).
- Delivered landing pages and small business websites.

FEATURED PROJECTS

Real-Time Payments Platform (Fintech, ZA)

[React Native](#) • [Next.js 16](#) • [React 19](#) • [.NET 9](#) • [SSE](#) • [QR](#)

Collect-and-settle payments on national real-time rails: mobile app, embedded checkout, POS and merchant / admin portals with QR payments and biometric auth.

Retail ERP & CashDesk (Grocery Chain)

[.NET](#) • [Angular](#) • [RabbitMQ](#) • [1C](#) • [PostgreSQL](#)

Full-stack work on an ERP and cash-desk (POS) system for a grocery retail chain: document flow across 1C, CRM and registers, kept balanced by a storno-based regression mechanism.

AI Interview Platform (HR-tech)

[Angular](#) • [.NET](#) • [Google Gemini](#) • [RabbitMQ](#) • [SignalR](#)

LLM-driven interviews: adaptive questions, answer scoring, credits ledger, and async PDF verdicts. Clean Architecture with CQRS (MediatR).

Health Benefits Platform (InsurTech, US)

[React 19](#) • [Redux Toolkit](#) • [Clerk](#) • [Vite](#) • [SSE](#)

Multi-role ICHRA platform: census XLSX/CSV import, affordability analysis with live SSE progress, plan selection and document e-signature.
